A message from our Chief Executive Officer

Dr. Edgar B. Phillips Chairman of the Board

As the newest member of the management team at New England Rare Coin Galleries, I welcome this opportunity to greet you on behalf of our company and invite you to become part of the growing number of coin collectors and investors we are pleased to have as clients.

Management is my chief concern, and these days there's quite a lot to manage in the world of coins. The industry continues to enjoy phenomenal growth and so does our company. As a consequence, we are combining the latest tools of modern management, such as the computer, with our well-known person to person service. We are constantly improving and updating our methods to best serve our customers' needs.

In the past year, we have expanded our facilities and entered the exciting and very important area of rare coin auctions through our affiliate company, New England Rare Coin Auctions. This is a fast growing part of the coin business and an area which I believe will greatly increase in importance as time passes. Still another sector which promises vast potential is numismatic investments. We are actively pursuing this market and I will have more to discuss regarding it at a future date.

Thank you for your continued confidence in New England Rare Coin Galleries. I look forward to meeting many of you in the months ahead.

Price is determined by the true grade of a coin...

Dear Friends,

As you pursue your numismatic interests, it is all too easy to allow the importance of accurate grading and true value escape you. At New England Rare Coin Galleries, we believe that the grading standards established are the most accurate and conservative in the entire numismatic field. We all know that pricing is determined by the true grade of a coin and current market condition. And, as a result of our understanding of the market and our grading standards (which are painstakingly followed by all members of our staff), New England Rare Coin Galleries consistently gives you the best value for your money. Our growing number of satisfied clients will attest to this fact, and our meaningful authenticity/grading guarantee and thirty day return privilege give it still further credence.

Throughout this catalog you will see type coin offerings. Whether you are a collector or investor, we will be pleased to help you assemble a type collection that you will be proud to own.

This new catalog number 5 contains many items of interest to all numismatists. Due to our rapid inventory turnover however, I strongly suggest that you telephone us to reserve your order. This will eliminate the inconvenience or disappointment that a "sold out" order may cause.

I hope you get as much enjoyment reading this catalog, as we did in preparing it.

Thank you for your continued trust and patronage.

Sincerely,

A handwritten signature in dark ink, reading "Jim Halperin". The signature is fluid and cursive, with a large, stylized initial "J".

FLYING EAGLE CENTS

The act of February 21, 1857 authorized coinage of the first small cent. It was our shortest-lived design, only being used for two years, 1857-1858. Although the year 1856 is actually a pattern, it is usually collected as part of the series.

INDIAN HEAD CENTS

This small cent was designed by James Longacre, whose initial appears on some 1864 Bronze coins. "White cents" were issued from 1859-1864. Due to the alloy during this time, the coins have a very light, distinct color. During the years 1908-1909, coins were also struck in San Francisco as well as in Philadelphia. Choice red uncirculated coins are difficult to locate and are recommended at this time.

Designed to commemorate the 100th anniversary of Lincoln's birth, the cent first appeared with the designer's initials, Victor D. Brenner, on the reverse. This caused some public dissatisfaction, and the initials were removed midway through the year creating a very popular U.S. coin. The series in general, has been very popular recently and collectors are beginning to realize the great difficulty in acquiring truly choice specimens. We are constantly buying quality coins so please let us know your specific wants.

Another short-lived series and extremely popular with both collectors and investors. Choice, high quality specimens are difficult to obtain, as is the case in all of the copper coinage. You will notice a tremendous similarity to the Shield Nickel as Mr. Longacre designed both issues.

THREE CENT PIECES (NICKEL)

A very quiet series but deserving attention. The mintage figures are incredibly low on many dates and choice coins are elusive. This is a series that most collectors can complete without great difficulty, as it does not contain any excessively rare dates. If you would like to assemble a set of these coins, please give us a call so that we may assist you in purchasing high quality specimens that you'll be proud to own.

SHIELD NICKELS

Two types are available in this series. The first type (1866-1867) is with rays and is a notoriously weakly struck issue. From 1867-1883 coins were issued of the same design, but without rays. Due to the hardness of the metal, nickel, most coins lack full detail. Those which are fully struck are worth a premium as they are genuinely scarce and quite desirable.

LIBERTY HEAD NICKELS

A popular Charles Barber designed series. The first year of issue lacked the words "cents" on the reverse so a few enterprising individuals gold plated the coins and passed them off as \$5 gold pieces. This was soon changed to the type, which continued until 1912, containing the word "cents". This five cents series was the first to have a branch mint mark appear. Both the 1912 Denver and San Francisco coins are scarce and very desirable in choice condition. As is with the Shield Nickels, the coins in this series are also quite difficult to obtain fully struck. Premium prices should be expected when purchasing superb specimens and phenomenal prices for superb, fully struck coins. Some dates in the later part of the series simply do not exist fully struck.

BUFFALO NICKELS

Characteristic of the time, the rugged looking Buffalo Nickel was very well accepted during its 26 year stand. As with the other nickel issues, this series is also found weakly struck. Collectors assembling fully struck sets must be very patient and be willing to pay for the quality they desire. Our stock is constantly changing so please keep us informed of the dates you are looking for.

THREE CENT PIECES (SILVER)

The smallest of United States coinage was issued from 1851 to 1873. All pieces were coined in Philadelphia with the exception of 1851 which included a small mintage of New Orleans specimens. Type two coins (1854-1858) are scarce in uncirculated condition and type threes (1859-1873) are only readily available in proof. Although mintage figures for type threes indicate business strikings, the coins were melted or exported and are rarely encountered.

BUST HALF DIMES

In 1829, after a 25 year absence, the half dime made its appearance again. The designer was William Kneass and all years (1829-1837) were struck in Philadelphia. A very popular series due to its limited issue (9 years), as well as its beauty and scarcity in uncirculated condition.

LIBERTY SEATED HALF DIMES

Designed by Christian Gobrecht and issued from 1837-1873, this series has recently received great attention. The true scarcity of many dates in uncirculated state has been seen by the phenomenal new values being established. We have an extensive inventory of all Seated Coinage and hope that you may find several desirable items among these offerings.

The A.N.A. was formed in 1891 by five noted numismatists and 61 charter members in Chicago. It was the brainchild of Dr. George F. Heath, of Monroe, Michigan, who, when not occupied by his private practice, gained a knowledge of world history through the study of his coin collection. Unfortunately, living in a small town hindered his collecting efforts and his communication with fellow numismatist. In 1888, he printed, published and distributed a four page leaflet "The Numismatist", in which he listed his needs, advertised duplicates and discussed numismatic topics.

The true scarcity of fully struck coins, with split cross bands, is obvious to the collector who is still trying to complete his collection after searching for such a long time. EARLY HALF DOLLARS

An area for the astute numismatist to pursue. Early type has always been a desirable area for either the date or type collector. Be sure to check with us when you are in need of material from this era. If the coins you request are not immediately in stock, we will do our best to locate them for you.

1796 15 STARS, CH. AU(55+). Don't let our conservative grade fool you. This is traditionally one of the most overgraded of all U.S. type coins. The present coin is fully proof-like with full denticles and partially raised edges. Attractive violet and gold toning. Exceptionally well struck with 100% full hair detail, stars, wing and tail feathers and eagle's head. Nearly 50% full breast feathers. No adjustment marks, probably no actual wear; just the barest traces of friction in the fields and on the highest points. In our opinion, there are only two real Unc's of this type (and only one of this date) in collectors' or dealers' hands. Both coins are in private collections. Of all the so-called proofs and Unc's of this type we've seen offered in the past 5 years, this is the only one we have considered to be even strictly AU! This is easily the finest small eagle half dollar to be offered in sale in the past five years. The dealer we purchased this from graded it Gem Unc and second finest known. We agree with the latter part, and we are proud to offer this coin properly graded as Choice AU. When you see the coin, you will realize that our price is very reasonable. 34,500.00

1806 PT.6, STEM NOT THRU CLAW, EF-AU(45). Unusually well struck. Choice, original color. 450.00

1806 PT.6, STEM THROUGH CLAW, UNC(60). Attractively toned. A choice coin with gorgeous lustre and even natural toning. Fairly well struck for this notoriously weak issue. No major bagmarks or impairments of any kind. A beautiful coin, worthy of the finest collection. 4,950.00

"As usual, I'm very satisfied with my new coins. Again, thank you for your excellent service of my account and your fine choices."

CAPPED BUST HALF DOLLARS

As Mr. Overton stated, "These early U.S. silver coins are not only beautiful and fascinating but due to the large numbers made and the die making and minting methods of the earlier years, there exists a myriad of die varieties and subvarieties, that seem to be unequaled by any other series, not even the large cents."

BUST SILVER DOLLARS

The word dollar evolved from the German Taler, the first large European silver coin. Dollars were first issued in 1794 with a design by Robert Scot. They were struck until 1803 but did not reappear until 1840 with the Seated Liberty type. Always a popular coin.

make the difference.

The best Investment:

A personal opinion from
Edward Lee, Investment Director

Many people (myself included) believe that investing in rare coins affords them the best possible opportunity to dramatically increase their investment income. Investment income derived from rare coins can be very important to your future as the tax rate for coins held more than six months is usually less than your income tax rate. In other words, it is both easier and more profitable to let your investment work for you

To say that "purchasing top quality rare coins is the best investment," is a value judgement. However, to state that the average annual gain from uncirculated, early U.S. coins over the last ten years has been superior to all of the traditional avenues of investment, is not a value judgement. It is a demonstrable fact

As some of you know, I have been a numismatist for 18 years and have had ample opportunity to observe the profit march of uncirculated rare coins. Recently I have been going over some of my records concerning the numismatic portfolios I assembled ten or more years ago. It was interesting to see that the average annual rate of gain for my past clients has exceeded 40% per year. In a number of cases, the annual gain has exceeded 60%. My numismatic research indicates that the average uncirculated (pre-1930) U.S. type coin has experienced 43% annual gain over the last decade. This form of research involves comparisons of catalog price and I fully realize that some of you wish to know what the rate of gain for "real" coins has been. To further illustrate the incredible performance of numismatic investments, I went back to one of my ads which appeared in the February 1966 issue of Numismatic Scrapbook Magazine. I selected a representative sample of the coins advertised then and will now list them in this analysis

I think you'll agree that the past history of rare coins as an investment is quite impressive. At present it seems to me that this year will either be the best or second best in the recent history of numismatic investing. And the future appears very bright.

Should you decide to invest in rare coins, I would be pleased to provide you, at no charge, several analyses of the history of numismatic investing excerpted from the manuscript of the book I am writing entitled, "Investing In Rare Coins: Successfully." If you are currently an investor in rare coins, it would very much be in your best interests to allow me to put my 18 years of experience to work for you. I will design a numismatic investing program uniquely suited to your specifications. When joining our investment program there is never any need to give up control of your funds. In fact, I prefer that you exercise as much control over the selections for your investment portfolio as you feel comfortable with. We assure you that the coins you select will be of the same quality as those which have averaged more than 40% actual gain per year over the last decade. No honest person can promise that you'll earn a certain rate of return on your investment, but I can say that I will do anything, within reason, to insure that your investment experience will be as secure, profitable and pleasurable as possible. If you have any questions, please feel free to call me on our toll-free WATS line (1-800-225-3858)

PEACE DOLLARS

As a result of the Pittman Act in 1918, which allowed for the melting of 270 million silver dollars to replenish the bullion supply, the Peace Dollar was issued in 1921. The first design, of high relief, was impractical for coinage and was slightly modified in 1922. Fully struck coins of 1921 and most branch mints are difficult to locate and premiums should be expected.

WANT LISTS

Nearly half the coins we handle never appear in advertisement or catalog. Instead, they are sold immediately to customers who have sent us their want list. If you are looking for a particular coin, or coins in a particular grade, please send us a want list and we'll do our best to locate them for you.

The acquisition of truly Gem Gold coins is very difficult. Due to the softness of the metal, most coins have severe imperfections from bagging or mishandling. Charlotte and Dahlonega specimens are usually found weakly struck with mint caused imperfections. We recommend purchasing quality gold coins at this time as we feel that there will be an upsurge in interest and as a result, price increases, in the very near future.

EARLY HALF EAGLES

A very beautiful and desired area of coinage. Unfortunately, most collectors can not afford to pursue an early series such as this in high grade. We feel that purchasing a nice circulated coin will enhance the finest collection and will be a coin that you'll be proud to own.

The week of June 25-29, 1907 was a week that saw many rarities change hands with the sale of the Stickney collection by noted Numismatist Henry Chapman. Price records were set in all categories, with some of the major rarities, such as the 1787 Brasher Doubloon bringing down the gavel at the unheard of figure of \$6,200. The collection also contained a specimen of an 1804 silver dollar which Stickney acquired from the Mint. The entire collection comprised 3,026 lots and realized \$37,859.21.

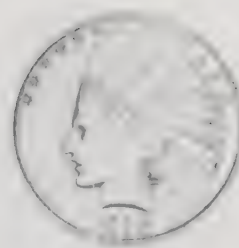

INDIAN HEAD EAGLES

Augustus Saint-Gaudens introduced two beautiful gold coins to us, the Indian Head Eagles and Saint-Gaudens Double Eagles. He is considered by many the greatest of modern sculptors evidenced by these two types. Indian Head Eagles are, in our opinion, a type which is destined for great future appreciation. True Gem coins are almost impossible to find but are worth the necessary wait. You'll be proud to own these beautiful coins.

"The Federal Government authorized its first coin, the Fugio Cent, in 1787 to be minted by one James Jarvis. The contract assigned Jarvis to deliver 300 tons of finished coins, or about 29 million pieces. It seems Jarvis intended to subcontract most of the coinage as he only produced 400,000 pieces."

CALIFORNIA GOLD COINS

The rarity scale can be interpreted as follows: Rarity 4: 1 to 3 pieces known; Rarity 3: 4 or 5 pieces known; Rarity 2: 6 or 7 pieces known; Rarity 1: 8 to 10 pieces known.

In cases where no rarity number is given, the coin can be assumed to be relatively common. Of course some will be much more common than others.

There are quite a few ways to collect California Gold coins, whether by type, date or die variety. It is a fascinating facet of numismatics.

The comprehensive reference book on colonial coinage...

**NOW AVAILABLE TO YOU
IN A LIMITED EDITION**

This new book has been produced in a limited printing of 10,000 copies to commemorate the 200th Anniversary of the founding of the United States of America.

Its blue cover represents one of the national colors of the U.S. The paper is antique in style, with uncut edges to simulate books of early America. The cover design stamped in gold is the obverse of the doubloon, produced in gold by Ephriam Brasher, a neighbor of George Washington, as a pattern for the Congress to consider as coinage. 154 pages. Hardcover.

"Until relatively recent time, U.S. colonial coinage has been a greatly overlooked series, particularly in light of its great importance and historical significance. Only in the last two or three years, with the coming of our nation's Bicentennial, has collector interest in this series come into its own.

The need for a comprehensive reference work on the subject of Colonial coinage, is greater now than it ever has been in the past. First, because there are many new collectors of this series who have use for such a work. Second, because such a reference book will no doubt increase interest in this important series even further. Strangely enough, no other definitive work on this subject has been published in over one hundred years.

Sanford Durst, world renowned numismatic scholar and author, has taken on this most difficult task, very admirably indeed. Not only does this book contain historical information on both colonial monetary history and on the individual coinage

"Comprehensive

American
Colonial
Coinage"

issues themselves, but current price data and auction prices as well. Combining histories of both the present and the past in an interesting, informative and useful format, is what Mr. Durst has successfully accomplished.

I will not hesitate to recommend this important book to my own clientele, and to the rest of the numismatic world as well. I also look forward to future editions, which, in addition to updated price information, will eventually include even more complete grading information on each of the specific colonial issues. This is an important feature which has never before been offered in any numismatic reference to my knowledge."
